- white water based ink greaseproof paper, substance: 40g/m², g/m²
- water based ink

is suited to packing of food, does not pose a health risk provided that it is used properly and meets food safety requirements and requirements for products intended to come into contact with food.

1. We confirm that the above mentioned product complies the following requirements:

1 . Regulation (EU) No. 1935/2004 of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with food and repealing Directives 80/590/EC and 89/109/EEC, L338/4;

2. Commission Regulation (EU) No. 2023/2006 of 22 December 2006 on good manufacturing practice for materials and articles intended to come into contact with food.

3. Directive 94/62/EC of the European Parliament and of the Council of 20 December 1994, regarding packaging and packaging waste.

2 . The contents of heavy metals

According to the declarations of our suppliers, the total content of heavy metals present in packaging (lead, cadmium, mercury and hexavalent chromium) does not exceed 100 ppm by weight. The contents of heavy metals were determined according to the European Parliament and Council Directive 94/62/EC of 20 December 1994 on packaging and packaging waste with amending acts Directive 2004/12/EC and Directive 2005/20/EC.

3 . Specification of the intended use or limitation:

- 1. Type(s) of food intended to come into contact with the material: fast-food, moist food, fat-containing food (with low fat content)

- 2. Time and processing temperature and storage in contact with foodstuffs: Above mentioned product is intended for use under the following conditions:

- 3. Using restrictions in contact with foodstuffs:

They are not intended for cooking and for use in a traditional oven and in microwaves, they should not be eaten, they can not be used as a toy.

4. The condition of storage

Keep in dry place, protect from sunny light and humidity.

5. Traceability of the product

For each batch is prepared the traceability record. Production batch identification is possible based on the label of each package of individual and collective. Each label contains: code of product, amount of item in the packaging, name of product, name of distributor and batch's number. Every claim will be examined based on this data.

This declaration is valid until the moment of meaning changes in the product, in a production process or in legislation.
